

Trend Micro™

ANTIVIRUS FOR MAC®

Essential Online Protection.

As a Mac user, you need privacy protection when shopping, banking, and socialising online. Macs are no longer immune to viruses and other Internet threats. **Trend Micro™ Antivirus for Mac®** safeguards your digital life and protects it against online threats, dangerous websites, and identity thieves.

Its unique security, designed to safeguard your privacy on social networks like Facebook, Google+, Twitter, and LinkedIn. With Trend Micro, you can relax and enjoy your digital life safely.

KEY BENEFITS

**Blocks Dangerous Websites**

Protects against viruses and spyware by identifying dangerous links in websites, social networks, emails and instant messages

**Protects your Privacy on Social Networks**

Identifies Facebook, Twitter and Google+ privacy settings that may leave your personal information publicly available and vulnerable to identity theft

**Guards against Identity Theft**

Detects spam emails containing phishing scams that can trick you into revealing private personal information to cybercriminals

**Provides Safe Surfing**

Prevents you from visiting dangerous websites so you can browse online safely

WHY IT'S BETTER

With expertise gained over 26 years, Trend Micro is a security software leader that delivers:

- The fastest protection against new web threats*
- Top rated protection, blocking sites trying to trick you into downloading malware*
- Unique cloud-based protection, safeguarding our customers from over 250 million threats per day
